Green Town

Facilities

Services in Green Town

That's all you can find in our town:

- Many green areas: parks and green playgrounds
 - A public library with a lot of books (made of recycled paper)
 - Many plant shops for a greener town!
-

ENERGY

Green Town is powered only by solar and hydraulic energy: we want an environmentally friendly town!
We never use non-biodegradable energy sources

Green areas

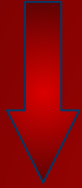

There are a lot of parks. The most famous is Parpapark.

Close to the parks there are squares and a car park, too.

In the parks children can play, instead people can go for a walk, talk and relax.

Types of houses

There are big, small and futuristic houses

Normal houses

There are also mountain houses

Luxury home

Futuristic houses

There are a lot of means of transport such as buses, trains, ferries , planes and underground trains.

To keep the city protected, these vehicles must be **powered by non-polluting materials**, such as in electric cars. The best vehicle remains the classic bicycle!
