CLASSE II G

THE WIND CITY

Welcome to Wind City

Our city is completely powered by wind turbines.

FACILITIES IN OUR CITY

In our city there are all the facilities to live.

- There is a supermarket but it is powered by solar panels.
- In the centre there is a big fountain and a lot of bikes to travel around the city.

The bikes are environmentally friendly.

- There isn't a shopping mall but only small shops.
- There is a restaurant to spend the weekend evenings.
- In the suburbs there are a lot of houses and a big playground for children.

THE HOUSES

The houses aren't tall and in every house there is a garden to play.

They are made of dark wood like mountain houses.

In the house garden there is a water well.

WHAT DO PEOPLE USE TO MOVE AROUND THE CITY

In this city people use electric
trams and bikes. People don't use
cars.

THE GREEN AREA IN WIND CITY

1. The green area is situated in the suburbs, near the houses. In this area there is a pets area and a playground for children. In the centre there is a little swimming pool for kids in summer. In this park there are a lot of wind turbines.

THIS IS OUR "WIND CITY"
